The Difference Between

Aligners

- Made of clear, smooth plastic, aligners are virtually invisible when worn.
- Transparent and nearly invisible, making them a popular choice for individuals who prefer a more discreet option.

Metallic Braces

- Consist of metal brackets attached to the teeth and connected by metal wires.
- Clearly visible due to the presence of metal brackets and wires.

www.brightsmile.com

The front surface of THE TEETH IS REDUCED BY VENEERS

Veneer

Create veneers

The veneer is inflated onto the surface of the tooth.

VS

Bleaching

A bleaching material is used.

The teeth become white after the material is cleaned.

FLOSS

Daily use of dental floss cleans between the teeth, even areas where the toothbrush does not reach.

BRUSH

Brush your teeth with fluoride toothpaste twice a day, morning and evening.

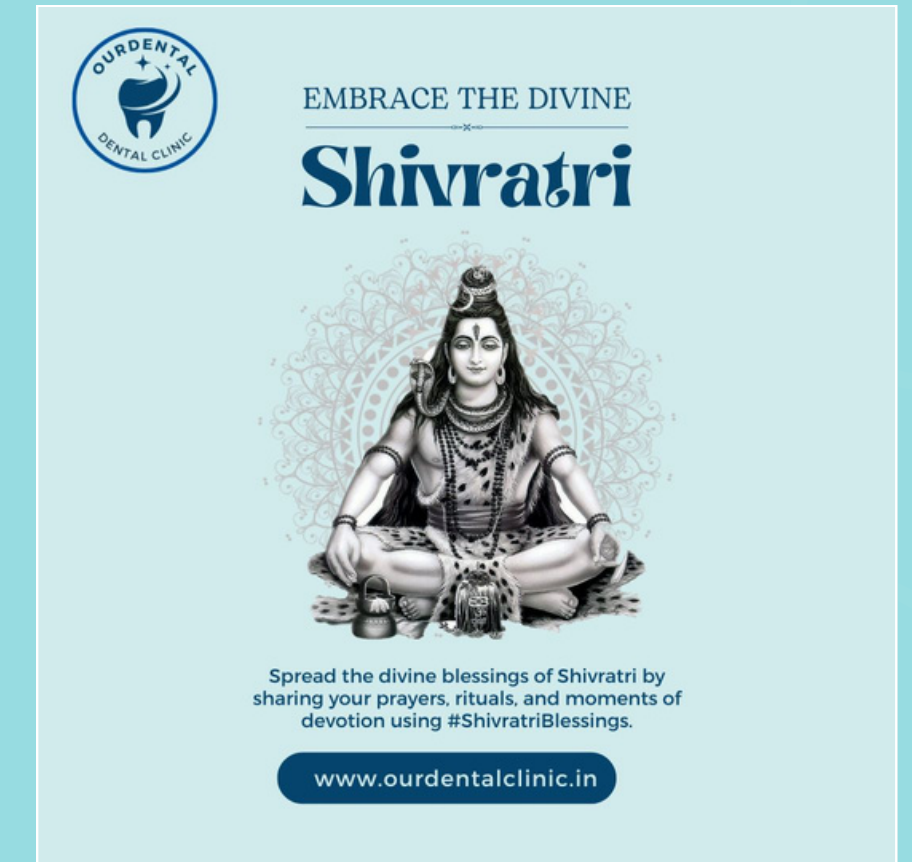

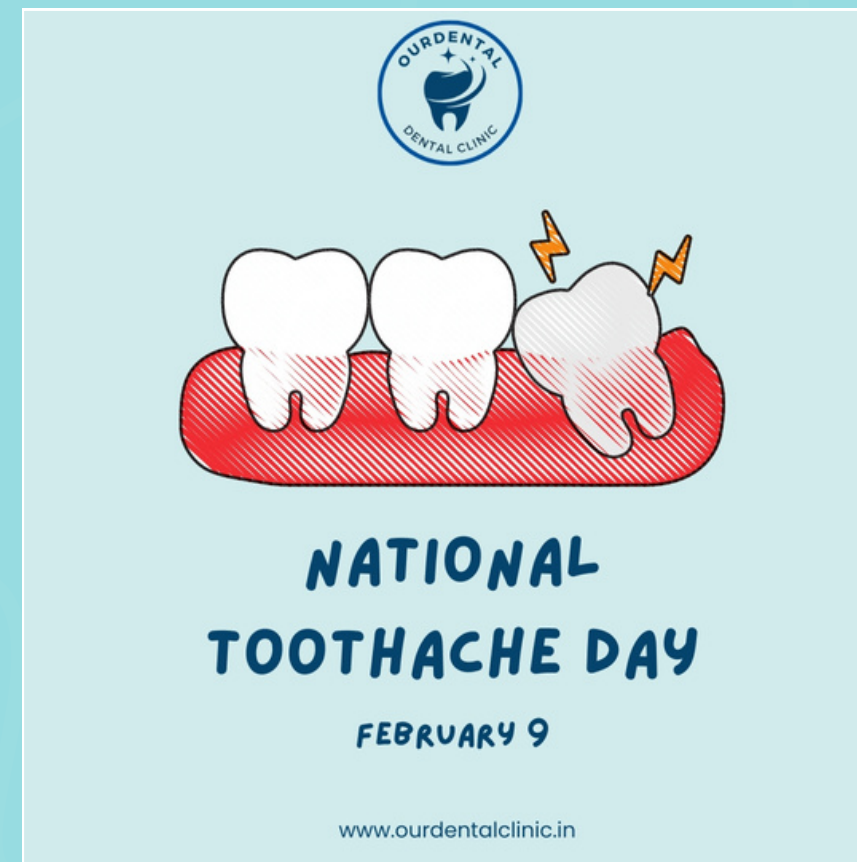

RINSE

After flossing and brushing, we recommend that you finish by rinsing with a fluoride mouthwash.
